PLANNING SOLUTIONS

The ability to prepare, respond & recover from an emergency are essential to all educational facilities. The goal is to minimize the impacts of an emergency. Plans document the procedures to accomplish this task. They must include simple, clear & easy instructions that are likely to affect your organization.

TRAINING SOLUTIONS

Occupants of your school, security and facilities staff need to know what to do in the event of an emergency or crisis. Do you have training developed that is specific to your school? We customize training for every need in your organization and can deliver it at your location in whatever timeframe you have available.

COMMUNICATIONS SOLUTIONS

A poor communications plan can undermine an effective response & recovery effort. A well designed communications plan will allow your school to better respond in an efficient & effective manner with timely messaging to stakeholders. A crisis communications plan includes an explanation of policies, roles for messaging, stakeholder groups & message templates for consistent communications.

EMERGENCY OPERATIONS PLANS (EOP)

EPS can guide the process of building or refreshing your EOP. Once your hazards are identified, EPS can build a plan that identifies the unique needs & requirements of your school and identify who will play a role in the preparedness, response and recovery phases of the emergency. The plan must be cohesive to include procedures for external responders, internal responders, employees and visitors. After the EOP has been developed, EPS personnel can assist in developing training & a validation exercise that allows organizational staff to use the plan in a simulated fashion to an event.

ACTIVE SHOOTER/WORKPLACE VIOLENCE TRAINING

Active shootings/person with a weapon at schools or in the workplace incidents are on the rise. These incidents are often unpredictable and evolve quickly. In the midst of the mayhem anyone can play an integral role in preventing and/or mitigating the impacts from a tragic incident, if they know what to do. Many times, these incidents are over before law enforcement arrives, so knowing what to do can save lives in a matter of seconds.

EPS can develop a program and facilitate it as a standalone program or a train the trainer program so that your staff can then provide the training in the future. The training incorporates best practices from the Department of Homeland Security and law enforcement.

CUSTOMIZED TRAINING, DRILLS & EXERCISES

No matter what your training, drills or exercise needs, EPS can provide you exactly what you want. We customize training, drills & exercises for every need in your organization and can deliver it at your location in whatever timeframe you have available. Don't know what your training needs are??? We can conduct a review of your emergency management program to assist you in figuring that out.
